SUMMARY

Frontend developer with **6 years** in the field, and a design background I never fully left behind. I started out in graphic design and art direction, then moved into code, so I tend to think about how an interface is built and how it looks at the same time. Most of my work is product UI and design systems in **React and TypeScript**. I've built design systems across React and Vue with Storybook and design tokens, and I get up to speed on large, data-heavy products fairly quickly.

EXPERIENCE

Frontend Developer · Sermes CRO

Jun 2025 – Present

The only frontend on a **clinical trial management system (CTMS)**, built in React 18, TypeScript and Vite.

Reworked the frontend architecture early on: a feature-based structure using **Domain-Driven Design** and hexagonal architecture, so the business logic stays separate from the UI and from external services.

Broke the interface down into small, atomic components as the starting point for a **design system** we could actually maintain and keep visually consistent.

Moved styling onto design tokens, kept Tailwind aligned with Figma, and set up a **Figma MCP integration** so tokens and components don't drift between design and code.

Work with the designer day to day on how the tokens evolve.

Frontend Developer · Impulsum Studio

May 2024 – Feb 2025

Built and tuned marketing landing pages in **Next.js** with Contentful and Autotune.

Rebuilt the onboarding flow on the IH platform with **XState** state machines, which improved conversion and took some load off support.

Contributed to Composer (cmpsr.dev), an open-source tool for composing components.

Kept everything covered with Cypress and Jest.

EXPERIENCE (CONT.)

Frontend Developer · John Deere

Apr 2023 – Apr 2024

Maintained and extended a large internal platform in **TypeScript, React and Redux**.

Improved reliability with Cypress tests and a round of frontend performance work.

Built responsive layouts with Sass and CSS Modules, and worked with the backend teams on API integration.

Frontend Developer · Apto Payments

Oct 2021 – Nov 2022

Built and maintained the core of a fintech platform in **React with TanStack Query**: real-time data, card management, account flows.

Launched a second platform from scratch in **Vue.js**, integrating several third-party financial APIs.

Wrote a cross-framework design system in React and Vue, documented in Storybook and used across both products.

Set up our documentation with Docusaurus and ReDoc, and got a Jest and Cypress testing habit going on the team.

Frontend Developer · The Seed Squad

Jul 2021 – Sep 2021

Built a CRM from scratch in **Nuxt.js** and Tailwind CSS.

Connected it to Directus over REST and GraphQL.

EARLIER — Marketing & Design Manager (Artecristal, 2019–2020) · Graphic Designer & Photographer (Artesolar, 2018–2019) · Graphic Designer & Illustrator (Wonder Photo Shop · Fujifilm, 2018).

TECHNICAL SKILLS

LANGUAGES

TypeScript, JavaScript

DESIGN SYSTEMS

Storybook, Tailwind CSS, Figma tokens, Radix UI, DevExtreme

FRAMEWORKS

React 18, Next.js, Vue.js, Nuxt, Vite

TESTING & STATE

Jest, Cypress, React Testing Library, XState, TanStack Query, Redux

EDUCATION & TRAINING

Master in Design and Art Direction

EsDesign – Universidad Internacional de Valencia · 2018–2019

Epic React

Kent C. Dodds · 2022

English C1

International House · 2008–2016

Fullstack Developer Bootcamp

Upgrade Hub · 2020–2021

Degree in History of Art

Universidad Complutense de Madrid · 2011–2015
