PROFILE

Frontend developer with six years building product in React and TypeScript, and a design background I never left behind: I started in graphic design and art direction, so I think about how an interface is built and how it looks at the same time. I work closely with Product Design across the UX/UI to frontend flow, building and maintaining the design system and co-owning components and definitions of done on both sides of the handoff, and I take features end to end, from design to production. I use the AI ecosystem (Claude Code, MCP) with judgement, to propose better workflows rather than just run the existing ones: the repetitive work gets automated, while architecture and decisions stay mine.

EXPERIENCE

Sermes CRO · Frontend Developer

Jun 2025 – Aug 2026

Sole frontend developer on a Clinical Trial Management System (CTMS) · React 18, TypeScript, Vite

- Turned UX/UI designs into clean, reusable and accessible components, breaking the interface down into atomic pieces as the foundation of a design system the team can maintain.
- Built and maintained the design system with Figma tokens synced to code through an MCP integration, co-leading naming, components and consistency criteria between design and frontend.
- Restructured the frontend architecture around Domain-Driven Design and hexagonal layers, keeping business logic apart from the UI and external services so it could scale and stay maintainable.
- Developed data-heavy interfaces (grids with server-side pagination, filtering and sorting; multi-step forms; stateful workflows), working with backend on API contracts.
- Created Claude Code agents and slash commands that scaffold components, generate tests and review PRs, automating repetitive work while keeping architecture deliberate.

Impulsum Studio · Frontend Developer

May 2024 – Feb 2025

- Rebuilt a conversion-critical onboarding flow with state machines (XState), improving metrics and reducing the load on the support team.
- Developed and optimised landing pages in Next.js with Contentful, with attention to performance and experience; all covered with Cypress and Jest.
- Contributed to Composer (cmpsr.dev), an open-source tool for composing components.

John Deere · Frontend Developer

Apr 2023 – Apr 2024

- Maintained and extended a large internal platform in TypeScript, React and Redux, in an agile, multi-team environment.
- Improved reliability with Cypress tests and a round of frontend performance work, collaborating closely with backend teams on API integration.
- Built responsive layouts with Sass and CSS Modules, keeping consistency and code quality in a complex codebase.

Apto Payments · Frontend Developer

Oct 2021 – Nov 2022

- Developed and maintained the core of a fintech platform in React: card management and account flows, with account and card data kept up to date through TanStack Query polling.
- Launched a second platform from scratch in Vue.js, integrating several third-party financial APIs.
- Wrote a multi-framework design system in React and Vue, documented in Storybook and used across both products.
- Set up testing practices with Jest and Cypress and built the documentation with Docusaurus and ReDoc.

The Seed Squad · Frontend Developer

Jul 2021 – Sep 2021

- Built a CRM from scratch in Nuxt.js and Tailwind CSS, connected to a Directus backend via REST and GraphQL.

EARLIER Marketing & Design Manager (Artecristal, 2019–2020) · Graphic designer and photographer (Artesolar, 2018–2019) · Graphic designer and illustrator (Wonder Photo Shop · Fujifilm, 2018).

TECHNICAL SKILLS

FRONTEND

React 18, TypeScript, Next.js, Vue.js, Nuxt, Vite, modern CSS

PRODUCT & DESIGN SYSTEMS

Product design, UX/UI handoff, Storybook, Tailwind CSS, Figma tokens, Radix UI, accessibility (WCAG)

STATE & DATA

TanStack Query (polling), Redux, XState, REST, GraphQL

TESTING & QUALITY

Jest, Cypress, React Testing Library, clean code, Agile/Scrum, Git

AI & AGENTIC TOOLING

Claude Code · Model Context Protocol (Figma MCP) · Agent Skills · Subagents · custom audit agents · AI-assisted scaffolding · AI code review

EDUCATION

Master's in AI-Assisted Software Development (in progress)

BIG school · 2026 · LLMs, RAG, multi-agent systems, clean architecture, testing and CI/CD

AI & Claude Certifications

Anthropic Academy · 2026 · AI Fluency: Framework & Foundations · Claude 101 · Claude Code 101 · Claude Code in Action · Introduction to Agent Skills · Introduction to Model Context Protocol · Introduction to Subagents

Master's in Design and Art Direction

EsDesign · Universidad Internacional de Valencia · 2018–2019

Fullstack Developer Bootcamp

Upgrade Hub · 2020–2021

Epic React

Kent C. Dodds · 2022

BA in Art History

Universidad Complutense de Madrid · 2011–2015

English C1

International House · 2008–2016
